Installation & Setup Guide

College Fee Management System v1.0

System Requirements

- **Operating System:** Microsoft Windows 10 or Windows 11 (64-bit Edition)
- **Processor:** Intel Core i3 / AMD Ryzen 3 or higher
- **RAM:** Minimum 4 GB (8 GB Recommended)
- **Disk Space:** 500 MB free space
- **Display Resolution:** 1366x768 or higher (High DPI / 4K Displays supported)
- **Printer:** Any standard Windows-compatible printer (LaserJet, InkJet, Thermal, or PDF virtual printer)

---

1. Quick Installation Steps

1. Extract the client release ZIP file **CollegeFeeManager_v1.0.zip** to your target directory (e.g., **C:\CollegeFeeManager**).

2. Navigate to the extracted **CollegeFeeManager** folder.

3. Double-click **CollegeFeeManager.exe** to launch the software.

*(Optional) Right-click **CollegeFeeManager.exe** -> Select **Send to -> Desktop (create shortcut)** for instant access.*

---

2. Initial Setup & Default Login Credentials

On first startup, the application automatically initializes the SQLite database and seeds default user accounts:

User Role	Default Username	Default Password	Recommended Usage
System Administrator	admin	admin123	Full access to settings, user management, & restores.
Fee Collection Operator	operator	operator123	Fee collection, student registration, & receipt searching.

IMPORTANT: Change default administrator password after first login via **Settings & Backup -> User Management**.

---

3. Database & Backup Directory Locations

- **database/college_fee.db**: Main SQLite relational database storing student profiles, fee heads, and receipt ledgers.
- **backup/**: Automated timestamped ZIP backup directory created during manual or scheduled backups.
- **exports/**: Generated fee receipt PDFs and CSV reports exported from the application.
- **logs/app.log**: Application activity and error diagnostic log file.

---

4. Troubleshooting & FAQ

Q: The application fails to print fee receipts.

A: Ensure a default Windows printer is configured in **Windows Control Panel -> Devices and Printers**. The application routes receipts directly through the native Windows Shell printer driver.

Q: How do I move the software to a new computer?

A:

1. Run a database backup in **Settings & Backup -> Create Database Backup**.
2. Copy the generated .zip file to the new computer.
3. Install CollegeFeeManager.exe on the new computer and use **Settings & Backup -> Restore Database**.
